Annual report 2004: Clemmys guttata.

Contents:
1. Introduction in 2004.
2. Studbook population
3. Locations
4. Births in 2003
5. Imports
6. Deaths
7. Transfers
8. Publications

Introduction in 2004:

This annual report will summarize activities of the studbook breeding program of the spotted turtle Clemmys guttata. It has taken a lot of time by producing a studbook because there was a lack of knowledge by using the studbook software. The last years there has been no official registration for the studbook breeding program. This year the records are registered from 19.. till 2004.

The studbook-population:
In Holland five, in France one (representing a greater group of Clemmys-keepers) and in Germany one. (The population of Clemmys-keepers will increase in future, but new registrations after 16-06-2004 are not worked out at this moment.)
In Holland are four registered Clemmys-keepers, in France one (representing a greater group of Clemmys-keepers, but most of them have only young animals) and in Germany one. Everybody knows there are much more people who keep Clemmys, but their breeding-records are not registered.

Locations:
In Europe there are at this moment six locations, registered in the studbook Clemmys guttata.

Births:
In 2003 only on one location in Holland, one location in France and one in Germany births are registered.

Imports:
In 2003 two wild captured male Clemmys guttata are registered in Holland as new import founders.

Deaths:
In 2003 two adult females died on one location in Holland.

Transfers:
In 2003 6 young turtles were transferred in Holland, one captive-born male was transferred from Germany to Holland.
Publications:

Germany:
Tropfenschildkroten: Clemmys guttata. Publication bookshop Chimaira.

Holland:
Trionyx – jaargang 2, nummer 1
