Annual report 2009 *Chelodina mccordi*

Contents:

- 1 Introduction
- 2 Studbook population
- 3 Locations
- 4 Births
- 5 Imports
- 6 Deaths
- 7 Transfers
- 8 Research
- 9 Obductions
10. Activities planned for 2010
11. References

1.Introduction:

This annual report will summarise the progress of the studbook breeding programme of the McCords snake necked turtle (*Chelodina mccordi*).

2. Studbook population:

December 31, 2008 the total studbook population exists out of 51.51.334 (436) animals. The living population counts 37.37.171 (245) animals. Comparing these numbers you will directly see that almost have of the originally entered animals have died over the years.

3. Locations:

December 31, 2009 the 37.37.171 specimens were kept at 48 locations; 16 in the Netherlands, 14 in Germany, 2 in Austria, 5 in the United kingdom, 1 in Italy, 7 in Belgium, 1 in France, 1 in Spain, 1 in Portugal, 1 in Sweden, 1 in the Tjech rep., 2 in Poland and 1 in the USA. Good to see is the developing and expanding cooperation within mainly European countries.

4. Births:

In 2009 births are reported by 2 locations; 4 at location London Zoo, 4 at location Rotterdam Zoo. At the Rotterdam Zoo reproduction with the first original breeding group is stopped in 2009 as this group is more than good represented in the studbook. During 2008 and 2009 a second totally unrelated group is formed and from this group 4 hatchlings are reported.

5. Imports:

In 2009 no imports were recorded.

6. Deaths:

In 2009 20 deaths are reported.

18 Deaths concern death of hatchlings shortly after birth or during the juvenile phase. Rather large numbers of the deceased hatchlings and juveniles die after a period of refusal of food and actually starve. The reason for this behaviour is unknown and the studbook participants will be asked to report on this. Intensive research to death causes in a way of proper nutrition and housing is vital in this. It is the studbook keepers task to draft a questionnaire in order to get a better picture on how the turtles are fed and what housing conditions are with respect to water quality.

7. Transfers:

In 2009 30 transfers took place. 6 Transfers concerned transfers from a zoo to private participants and 4 transfers concerned a transfer from a private participant to zoo's; 12 transfers concerned between private participants and 8 transfers concerned a transfer among zoos. These transfers were recommended by the studbook keeper in order to spread genetic bloodlines and form unrelated breeding conditions. Due to the very limited number of founder animals it is very vital to pair up unrelated animals. The long time promised captive born animals from the USA will hopefully arrive this year. CITES/USF&W paperwork is in a final stage at present.

8. Research:

At the end of the year we have heard from Dr Gerald Kuchling that Erica Alacs have left the University of Canberra. It is unclear what the progress on the DNA research is at present. Gerald Kuchling in Australia is asked to investigate this. The studbook participants who supplied saliva samples will be separately updated as soon as further news comes from Australia.

9. Autopsies:

Can we learn from dead animals? Yes we can !!!

When we see in the studbook the average age of the juvenile common snake necked turtle reach is 2 or 3 months this is of great concern. A lot of animals

and juveniles have died the last years. As studbookkeepers we are very interested in the cause of death of the animals.

We think an obduction or autopsy must be carried out on all the animals that die from now on. We can judge and discuss the results with vets specialized in reptiles. Maybe and hopefully we can improve the condition of hatchlings in order to bring them to adulthood.

Death animals have to be put on ice water in a fridge (not a freezer!!) and send it to a qualified and autopsy experienced vet as soon as possible.

An obduction is very important for the owner and the other reptiles in his collection and those of other participants. Further information you can find on the website of the ESF, also about where to sent the animal to. At this moment the information is only in Dutch.

10. Activities planned for 2010:

- * Drafting and sending a questionnaire about housing and nutrition in order to trace and detect causes of the death of hatchlings and juveniles.
- * Improving autopsy on death animals by promoting the studbook participants to carry out an autopsy and discuss results with the Dutch ESF related post mortem vet Marian Mensink.
- * Evaluate and improve husbandry guidelines for the species.
- * Renew the contacts with the University of Canberra in order to boost the DNA research on the global ex situ assurance colony.
- * Intensify the contact with keepers/breeders outside Europe. It is hoped that this year unrelated animals will arrive from the USA.

D.W.A. Fontijne, studbook keeper

H.A. Zwartepoorte, co studbook keeper

March 30, 2009.
