### **Introduction.**

2015 was a very difficult year for the studbook.

there were many eggs, but at the end there were no froglets at all. Larvae only had two legs, of no legs at all. At the end of the year only location A has left.

Frogs from location D moved to location A. Only 8 frogs are left. One of them is a female.

From other locations nothing is heard.

The studbook registration will be reconsidered.

Bert Broers, studbook keeper *Hyla savignyi*
